Influenza viruses (the flu) typically circulate in the United States annually, most commonly from late fall through early spring. Most people who contract influenza recover without serious complications. However, influenza can result in serious illness, hospitalization and death, particularly among older adults, very young children, pregnant women and persons with certain chronic medical conditions. The Centers for Disease Control and Prevention has information available on this year's flu season on its website: <https://www.cdc.gov/flu/prevent/flushot.htm>

This year it will be more important than ever to get your flu shot. As we have done previously, Milwaukee County will provide free flu shots in October. Due to COVID-19, Milwaukee County and the vendor, Midland Health, will be taking additional precautions, including PPE and using a scheduling tool to ensure safe distancing. Please schedule your appointment below at the location of your choice, pre-print the consent form and bring it with you to your appointment time.

Questions? Contact the Benefits Division at benefits@milwaukeecountywi.gov or 414-278-4198.
